

In 2022 - assuming the master plan has been completed to your expectations - what amount of change has occurred at the park?

*Evaluating the degree of change in the park – **physical** (roads, buildings, landforms) / **use and activities** / **character** (feel and look) – based on a scale of 1 (no change) to 5 (complete change) – the largest number of respondents, 39%, felt the **character** of the park should not change although over 50% felt some change in character should occur and 63% and 59% felt there should be a slight to moderate change in the **physical elements** and **use** of the park respectively.*
