WOODWORKING

Local woodworkers have formed a non-profit organization, Bainbridge Island Community Woodshop to build a community woodshop. Members will be able to work on their own projects there, and the organization will work with the Park District to sponsor a robust series of classes for all skill levels. Membership in the group is open to all. To get on the email list, send a message to bainbridge-woodworkers@googlegroups.com. These introductory workshops give just a hint of what's to come.

INTRODUCTION TO WOOD CARVING

Jeff Iller, Instructor with the Kitsap Wood Carvers will show examples of different types of wood carving, including the rudiments of safety in hand carving, as well as the best methods for keeping tools sharp. Students will then learn basic carving techniques on a common project, using supplied carving knives and wood blanks. Students will select a carving project to complete by the end of the course with guidance from the instructor. Instructor will provide group instruction as opportunities present themselves in the work of individual students. Materials provided by instructor for a \$5 fee payable to instructor at first class. **CYC ++**

SHOP MADE JIGS

The shop-made jig is a frequently overlooked work aid that can increase the efficiency and precision of woodworking. We will answer questions such as: What is a jig? In what situations does one consider making a jig? How does one use a jig (including safety considerations)? We will demonstrate existing jigs and make a new jig showing the process from the idea to the finished part and what role a jig plays in the process. This class will improve and simplify your woodworking. This class is a continuation of the Jig class from last year. We will review the discussion, demonstrate different jigs and answer your questions. Instructor: **Bob Spangler**

JOINTS-JOINTS-JOINTS

What is a woodworking joint, why do you use it and which one do you use? In this class we will explore some of the various woodworking joint options, such as mortise and tenon, rebate and dado, biscuit and dowel, and explain which option is the appropriate one to use. What makes for a strong connection and how do you make it. We answer some of these questions and give demonstrations on how to cut the joint to make a perfect connection. Instructor: **Bob Spangler**
